Scala For DS

Practical - 20

Roll No. : 44	Name: Amit Umarvaish
Class : SYBSC IT	Batch : 1st
Date of Assignment : 18/08/2026	Date/Time of Submission : 18/08/2026

Practical 20

20) Read a CSV file and calculate basic statistics for each numeric column. Use the scala-csv library or similar tools.

Code:

```
import scala.io.Source

object Prac20 extends App {
  val file = Source.fromFile("src/main/resources/iris.csv")
  val data = file.getLines()
    .drop(1)
    .map(line => line.split(",")(0).toDouble)
    .toList

  file.close()

  val count = data.length
  val mean = data.sum / count
  val min = data.min
  val max = data.max

  val variance = data.map(x => math.pow(x - mean, 2)).sum / count
```

```
val std = math.sqrt(variance)

println(s"Count: $count")
println(f"Mean: $mean%.2f")
println(f"Minimum: $min%.2f")
println(f"Maximum: $max%.2f")
println(f"Standard Deviation: $std%.2f")
print("Amit 44")
}
```

Output:

```
Mean: 75.50
Minimum: 1.00
Maximum: 150.00
Standard Deviation: 43.30
Amit 44
Process finished with exit code 0
```
